

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

Siemens Data Science Master

Virtual Internship

AICTE – EduSkills Virtual Internship Program | Supported by Siemens

Aditya Kumar

Roll No. 2410030425 | B.Tech CSE

April – June 2026

**Aditya
Kumar**

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

Roll Number

2410030425

Institute

IILM University, Greater Noida, U.P.

Programme

B.Tech CSE, Batch 2024–2028

Internship Domain

Siemens Data Science Master

Duration

8 Weeks | April – June 2026

EduSkills, AICTE & Siemens

EduSkills Academy is an ISO 9001:2015 and ISO/IEC 20000-1:2018 certified organization working under the theme “Nation Building Through Skills.” It partners with the All India Council for Technical Education (AICTE) to run the AICTE–EduSkills Virtual Internship Program under the patronage of the AICTE National Internship Portal. For the Siemens Data Science Master track, EduSkills collaborates with Siemens to deliver an industry-aligned curriculum on the RapidMiner platform, covering business use-case identification, data engineering, machine learning, and enterprise platform administration.

ISO Certified

ISO 9001:2015 & ISO/IEC 20000-1:2018 certified organization.

AICTE Patronage

Run under the AICTE National Internship Portal.

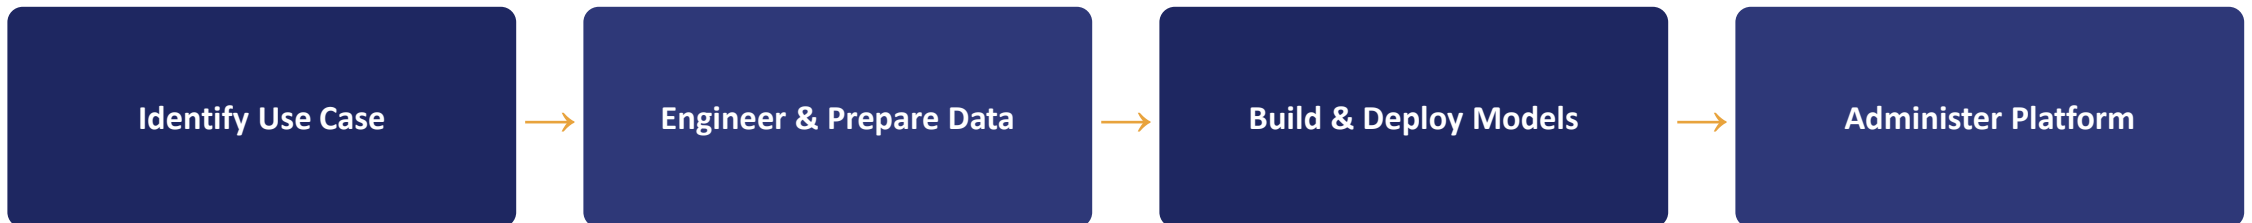

Siemens & RapidMiner

Enterprise data-science curriculum on the RapidMiner AI Hub.

Bridging Theory and Applied Data Science

Although many engineering students learn the theoretical foundations of data science and machine learning in coursework, very few get structured, hands-on exposure to the complete data-science lifecycle using an industry-standard platform such as RapidMiner. Concepts such as data engineering, automation, and enterprise ML operations are often understood only theoretically — with little practice applying them end-to-end.

This internship addressed that gap — practically learning the full RapidMiner-based workflow:

What the Internship Set Out to Achieve

Identify Business Use Cases

Learn to identify business problems suitable for AI and machine learning solutions.

Data Engineering

Access, load, transform, and calculate data as part of a structured data workflow.

Foundational Machine Learning

Build foundational machine learning skills and apply them to practical problems.

Advanced Data Preparation

Master advanced data handling and automation techniques.

Advanced Machine Learning

Learn advanced machine learning techniques for improved model performance.

Deploy & Administer

Deploy, monitor, and administer models on the RapidMiner AI Hub at enterprise level.

The Toolkit Behind the Internship

RapidMiner Studio

Core data-science workbench

RapidMiner AI Hub

Enterprise deployment platform

Business Analysis

Use-case identification

Data Engineering

Access, load & transform data

Machine Learning

Model building & evaluation

Data Preparation

Advanced handling & automation

Model Deployment

Deploy & monitor ML models

Platform Administration

Enterprise-level operations

From Business Problem to Enterprise Deployment

Business Layer

Identification of business problems suitable for AI and machine learning solutions

Data Engineering Layer

Accessing, loading, transforming, and calculating data to prepare it for analysis

Modeling Layer

Foundational and advanced machine learning models built and evaluated

Automation Layer

Advanced data handling and automation for streamlined data preparation

Deployment Layer

Trained models deployed and monitored within the RapidMiner environment

Platform Administration Layer

Configuration and enterprise-level management of the RapidMiner AI Hub

The 8-Week Learning Journey

1 WEEK

Applications & Use Cases Professional

Identify business problems suitable for AI and ML

2 WEEK

Data Engineering Professional

Access, load, transform, and calculate data

3 WEEK

Machine Learning Professional

Build foundational machine learning skills

4 WEEK

Data Preparation Master

Master advanced data handling and automation

5 WEEK

Machine Learning Master

Learn advanced machine learning techniques

6 WEEK

Applications & Use Cases Master

Deploy and monitor ML models

7 WEEK

Platform Administration Master

Configure and manage RapidMiner AI Hub

8 WEEK

Platform Administration Master

Enterprise-level platform operations

Skills & Capabilities Gained

- ✓ Ability to identify business problems suitable for AI and machine learning solutions
- ✓ Practical understanding of data engineering — accessing, loading, transforming, and calculating data
- ✓ Foundational and advanced machine learning skills applied to practical problems
- ✓ Hands-on exposure to advanced data preparation and automation techniques
- ✓ Capability to deploy and monitor machine learning models
- ✓ Skill to configure and administer the RapidMiner AI Hub at an enterprise level
- ✓ Successful clearance of the Final Credential Validation, resulting in an “Outstanding” grade

CERTIFICATION

Successfully Completed

Grade

O – Outstanding

Certificate ID

4db69df0cd4948ab839a

Student ID

STU69e109986bc351776355736

Duration

8 Weeks | April – June 2026
