

An Internship Report
Of
Siemens Data Science Master Virtual Internship

Submitted
To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering)

By

Roll Number of Student: 2410030425

Name of Student: ADITYA KUMAR

Batch: 2024-2028

CANDIDATE'S DECLARATION

I, ADITYA KUMAR, do hereby declare that the internship report titled “Siemens Data Science Master Virtual Internship” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature:-

Student Name: ADITYA KUMAR

Roll No.: 2410030425

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank the AICTE – EduSkills Virtual Internship Program team, EduSkills Academy, and Siemens for providing me the opportunity and the structured platform to learn and gain hands-on exposure in the domain of Data Science. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

Signature:-

Student Name: ADITYA KUMAR

Roll No.: 2410030425

Certificate of Virtual Internship

This is to certify that

Aditya Kumar

IILM University, Greater Noida

has successfully completed the 8-weeks

Data Science Master Virtual Internship

During April - June 2026

May this Internship learning propel you toward a bright and successful career.

GRADE- O (Outstanding): 90-100 | E (Excellent): 80-89 | A (Very Good): 70-79 | B (Good): 60-69 | C (Fair): 50-59 | D (Average): 40-49 | P (Pass): 30-39 | F (Fail): Below 30

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the 8-week Virtual Internship undertaken under the AICTE – EduSkills Virtual Internship Program, in the domain of “Siemens Data Science Master”, supported by Siemens. The internship was carried out from April 2026 to June 2026 as part of the requirement of the Bachelor of Technology (Computer Science and Engineering) programme at IILM University, Greater Noida. The primary aim of this internship was to build a strong practical foundation in data science and machine learning workflows, and to apply them to real-world business use cases using the RapidMiner platform, covering data engineering, model building, deployment, and enterprise platform administration.

The internship followed a structured, week-wise curriculum combining conceptual learning with hands-on assignments and project submissions, culminating in a Final Credential Validation. On successful completion of all the requirements, including the Internship Grade Point Assessment, a Virtual Internship Certificate with an “Outstanding” grade was awarded by EduSkills Academy under the patronage of AICTE and the National Internship Portal.

4.2 Organization Profile

EduSkills Academy is an ISO 9001:2015 and ISO/IEC 20000-1:2018 certified organization working under the theme “Nation Building Through Skills”. EduSkills partners with the All India Council for Technical Education (AICTE) to run the AICTE – EduSkills Virtual Internship Program under the patronage of the AICTE National Internship Portal. For the Siemens Data Science Master track, EduSkills collaborates with Siemens to design an industry-aligned curriculum, delivered through structured weekly modules covering business use-case identification, data engineering, machine learning, and platform administration on RapidMiner AI Hub, that helps engineering students build practical data-science capability.

4.3 Problem Statement

Although a large number of engineering students learn the theoretical foundations of data science and machine learning during their academic coursework, very few get structured, hands-on exposure to the complete data-science lifecycle – from identifying suitable business problems, through data engineering and model building, to deployment and platform administration – using an industry-standard platform such as RapidMiner. Concepts such as data preparation, automation, and enterprise-level ML operations are often understood only at a theoretical level, with little practice in applying them end-to-end. The problem addressed by this internship was to practically learn and apply the complete data-science workflow, from business-use-case identification to enterprise-level platform administration.

4.4 Project Objectives

- To learn to identify business problems suitable for AI and machine learning applications.
- To learn to access, load, transform, and calculate data as part of a data engineering workflow.
- To build foundational machine learning skills and apply them to practical problems.
- To master advanced data handling and automation techniques for data preparation.
- To learn advanced machine learning techniques for improved model performance.
- To deploy and monitor machine learning models in a structured environment.
- To configure and manage the RapidMiner AI Hub platform.
- To gain exposure to enterprise-level platform operations.
- To successfully clear the Final Credential Validation / Internship Grade Point Assessment.

4.5 Scope of the Project

The scope of this internship spans the complete data-science workflow on the RapidMiner platform – starting from identifying business use cases suitable for AI and ML, moving through data engineering (accessing, loading, transforming, and calculating data), building foundational and advanced machine learning models, and extending into automated data preparation, model deployment, and monitoring. It further covers configuring and administering the RapidMiner AI Hub at an enterprise level. The internship was limited to a virtual, simulation/lab-based learning environment provided by Siemens and EduSkills Academy, and did not involve deployment on any live organizational production system.

4.6 Technologies and Tools Used

- Data Science Platform: RapidMiner Studio, RapidMiner AI Hub
- Core Concepts: Business use-case identification for AI/ML, data engineering, data preparation and automation
- Machine Learning: Foundational and advanced machine learning techniques, model building and evaluation
- Deployment & Operations: Model deployment, monitoring, and enterprise-level platform administration
- Learning Platform: AICTE – EduSkills structured weekly learning modules and assessments

4.7 System Architecture

The general architecture followed during the internship for the Siemens Data Science Master learning track can be summarized in the following layers:

- Business Layer: Identification of business problems suitable for AI and machine learning solutions.
- Data Engineering Layer: Accessing, loading, transforming, and calculating data to prepare it for analysis.
- Modeling Layer: Foundational and advanced machine learning models built and evaluated on the prepared data.
- Automation Layer: Advanced data handling and automation for streamlined data preparation.
- Deployment Layer: Trained models deployed and monitored within the RapidMiner environment.
- Platform Administration Layer: Configuration and management of the RapidMiner AI Hub, including enterprise-level operations.
- Assessment Layer: Weekly assessments, project submissions, and a Final Credential Validation / Internship Grade Point Assessment track progress and final grading.

4.8 Methodology

The internship followed a structured, week-wise methodology combining conceptual learning, hands-on labs, and assessment-based evaluation, culminating in a Final Credential Validation, as summarized in the table below.

Week	Module	Description
Week 1	Applications & Use Cases Professional	Learn to identify business problems suitable for AI and machine learning.
Week 2	Data Engineering Professional	Learn to access, load, transform, and calculate data.
Week 3	Machine Learning Professional	Build foundational machine learning skills.
Week 4	Data Preparation Master	Master advanced data handling and automation.
Week 5	Machine Learning Master	Learn advanced machine learning techniques.
Week 6	Applications & Use Cases Master	Deploy and monitor ML models.
Week 7	Platform Administration Master	Configure and manage RapidMiner AI Hub.
Week 8	Platform Administration Master	Enterprise-level platform operations.
Final Credential Validation / Internship Grade Point Assessment		

Note: There was no stipend associated with this internship.

Each week concluded with assessments to evaluate conceptual understanding, and certain modules required submission of project documentation and assignments. In the final phase, a Final Credential Validation / Internship Grade Point Assessment was conducted, and the overall grade was based on performance across the weekly modules and this final assessment.

4.9 Expected Outcomes

- Ability to identify business problems suitable for AI and machine learning solutions.
- Practical understanding of data engineering, including accessing, loading, transforming, and calculating data.
- Foundational and advanced machine learning skills applied to practical problems.
- Hands-on exposure to advanced data preparation and automation techniques.
- Capability to deploy and monitor machine learning models.
- Skill to configure and administer the RapidMiner AI Hub at an enterprise level.
- Successful clearance of the Final Credential Validation / Internship Grade Point Assessment, resulting in an “Outstanding” grade.

4.10 Certificates of Completion and Communication Proof

The Internship Offer Letter and the Internship Completion Certificate issued by EduSkills Academy, confirming successful completion of the 8-week AICTE – EduSkills Virtual Internship Program in Siemens Data Science Master, are attached in Chapter 3 of this report and below. The

official completion e-mail from EduSkills Foundation is attached below as further communication proof.

Ref No: C16Y2026M081398388

Internship Offer Letter

Student Name : Aditya Kumar
Stream : B.Tech
Branch : B.Tech(Computer Science and Engineering)
Institute Name : IILM University, Greater Noida
Internship Domain : Siemens Data Science Master
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU69e109986bc351776355736

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Applications & Use Cases Professional	Learn to identify business problems suitable for AI and machine learning.
Week 2	Data Engineering Professional	Learn to access, load, transform, and calculate data.
Week 3	Machine Learning Professional	Build foundational machine learning skills.
Week 4	Data Preparation Master	Master advanced data handling and automation.
Week 5	Machine Learning Master	Learn advanced machine learning techniques.
Week 6	Applications & Use Cases Master	Deploy and monitor ML models.
Week 7	Platform Administration Master	Configure and manage RapidMiner AI Hub.
Week 8	Platform Administration Master	Enterprise-level platform operations.
Final Credential Validation / Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.

Dear **Aditya Kumar**,

🎉 **Congratulations!**

You have successfully completed **10 weeks Siemens Data Science Master** internship with EduSkills Foundation. Your certificate is ready — please log in to your profile and download it.

📌 Steps to Download Your Certificate:

1. Login at: <https://aictc-internship.eduskillsfoundation.org/>
2. Go to the **Certificate Section** from your sidebar
3. Click **Download Certificate**

Please post your certificate on your **LinkedIn profile** to get better job opportunities and visibility from corporates.

☀️ Why You Should Share Your Achievements on LinkedIn

1. World's Largest Professional Platform

LinkedIn has 900+ million professionals and 60+ million companies worldwide.

2. Recruiters Actively Use LinkedIn

Around 8 out of 10 recruiters use LinkedIn to find and verify candidates.

3. Profiles Are Checked Before Hiring

More than 90% of hiring managers review LinkedIn profiles before shortlisting candidates.

4. Better Visibility for Freshers

Students who post certificates, internships, and projects appear in recruiter searches more often.

5. Skill-Based Hiring is Growing

Employers now focus more on skills, certifications, and practical experience.

6. Higher Chances of Job Opportunities

Active LinkedIn profiles with achievements get more internship and job opportunities.

🔗 **Tip:** Always share your certificates, tag EduSkills, mentors, and peers to increase visibility and professional networking.

📌 Please Tag the following on LinkedIn:
